Transportation Electrification Partnership 2020 Summit!

Thursday, December 10, 12:30 PM-5:15 PM

Friday, December 11, 9:00 AM-12:00 PM

LACI's Transportation Electrification Partnership Summit will be a virtual event.

What is the Transportation Electrification Partnership? Formed in May 2018, the Transportation Electrification Partnership (TEP) is an unprecedented regional collaboration to go further, faster together toward a zero emissions future. In November 2019, TEP issued a 3-pronged Call to Action setting the nation's most ambitious targets for electric cars, charging infrastructure, mode shift and zero emissions trucks.

Why should you join us? The Summit will bring together TEP members, policymakers, industry leaders, startups, academic experts and advocates to share progress towards TEP's ambitious targets, reflect on the year in transportation electrification, and frame the opportunities and challenges for 2021. Topics will focus on TEP initiatives and other key efforts in the field:

Advancing TEP's federal stimulus proposal for zero emissions transportation

Sharing how other cities and regions across the US are transforming how we move people and goods

Supporting Governor Newsom's Executive Order via TEP's proposed California EV Authority

Prioritizing equity in transportation electrification, with updates on our electric car sharing and e-cargo bike pilots

Electrifying the I-710, where 40% of of the nation's goods move from the Ports of LA and Long Beach to the rest of the country

Showcasing TEP's last-mile zero emissions delivery zone pilot and other learnings

Unveiling of startup and corporate technology innovations
