**Zone 7 reports**

1. Will be requesting an update from LAUSD regarding current construction projects. I've been in communication with Tapia Fortunado and Mark Hovatter of LAUSD Facilities regarding updates on the Comprehensive Modernization project at Venice HS. Today they sent an Impact Notice regarding demolition that will take place at the Garden beginning November 16th. If you have not received the communication, please let me know. They have conducted outreach about the project to affected residents and participants in their town halls. For my Lyceum Residents, I know there are concerns regarding the fence that is leaning into your properties. They will be following up with a plan of action, which will not include replacing the fence. I will continue to request support in helping you maintain your residences. In general the completed up date will be amazing for our community: recreational space, training areas, updated aquatic facility, etc.
2. Growing interest for the development of a NA or Homeowners association. I support this idea and have a small network of stakeholders ready to lead the charge. Zone 7 is not included in WMVRA. An information and interest meeting will be held virtually the fourth week of January. The date will be announced at the next board meeting on the 12th.
