

March 2021 DWP Report Submitted by Adriana De La Cruz
MVCC Transportation and Infrastructure Committee
LADWP February 2021 Monthly Report

January 2, 2021 – NO MEETING

February 6, 2021 - **LADWP**

1. COVID-19 Response

As an essential service provider, our dedicated workforce is working around the clock to make sure you have the water and power services you need to help you stay Safer at Home. We're committed to helping you during this challenging time, while also protecting the health and well-being of our employees so that they can keep the power and water flowing 24/7.

Customer Support

COVID-19 Response

If you are experiencing a financial hardship, pay plans are available by visiting ladwp.com/financialassistance or by calling 1-800-DIAL-DWP. Other financial assistance programs are also available including a Low-Income Discount Program for qualifying customers.

Beware of Scammers

Scammers are taking advantage of the COVID-19 crisis and preying on unsuspecting individuals during this time. We have suspended disconnections due to non-payment, but we continue to receive reports of scammers representing themselves as LADWP, threatening to shut off water and power service if they do not receive payment immediately over the phone.

2. Fire at receiving Station K update

3/3/21 11:40AM Fire Receiving Station K on the westside. Many customers affected by the outage are reporting their power has already been restored. Others will continue to come online as crews continue working. No injuries. Limited damage. Crews are working now to switch circuits within the station to begin restoring power. Many customers affected by the outage are reporting their power has already been restored. Others will continue to come online as crews continue working.

3. Past Events

Virtual Job Fair on March 3 at 12 p.m. Learn how to apply for positions with LADWP in the Owens Valley. RSVP <http://bit.ly/3av1j5K>

4. Education

During this time of Covid-19 and Distance Learning, LADWP Education Outreach Section is working with our non-profit partners to transform in-school presentations to virtual formats and with our contracted company partners to offer digital editions of their printed lesson materials.

Several of these efforts have started, such as the “A Drop in the Bucket” live virtual program and interactive games and videos from The Wildwoods Foundation, and the e-SMARTkids link in the Electric Safety Section of this website, which added five new videos, and two new digital student books, one on water and one on hydroelectric science.

Additional live programs and digital materials will be added over the next two to three months. Printed materials will also be available once students are back in the class and upon teacher requests.

5. 100% Renewable Energy Study (Presentation)

At the request of Mayor Eric Garcetti and the Los Angeles City Council, LADWP has launched the LA100 Study (100% Renewable Energy Study) to determine what investments should be made to achieve a 100% renewable energy supply. Over the course of the study, LADWP will work with local academic institutions to examine the potential for high quality careers and local hiring programs that must be performed to modernize the city’s electric system infrastructure.

The comprehensive study will be developed with input from the LA100 Advisory Group, comprised of technical experts, research universities, commercial / industrial customers, local government officials, and community interest groups, among other partners. Several virtual community meetings took place providing an introduction and overview of the LA100 study.
