

Suggestions for MVCC POSe meeting 4/26/19 re LA River Resolution

On further thought, I believe the resolution recommended by WRAC is preferable to that written in the agenda. Substitute

- I. **Resolved:** MVCC requests all agencies (city, county, state, federal) study all options to reduce the impact and taxpayer cost of a 100-year flood. This includes County input in U.S. Army Corps control of the channel, removing sediment build-up, reducing hardscape (parking lots, building footprints) and expanding open space, increasing the size of spreading grounds and adding drywells to infiltrate stormwater into aquifers, adding swales to small medians and yards, strengthening dams and levees, and evaluating land use and zoning designations within the proximity of the river, which may result in downzoning. Note that spreading grounds and ponds/lakes behind dams can double as recreational areas.

With:

The Mar Vista Community Council (MVCC) requests that the County of Los Angeles coordinate flood protection and mitigation of existing flooding risks in the LA River area, with the US Army Corps of Engineers (Corps of Engineers) and the City of Los Angeles and its various departments tasked with city planning, architecture, flood mitigation and street services, among others. We ask that all agencies study options to reduce the impact of flood, the costs of which will largely be borne by tax payers, and that these studies include taking actions such as removing sediment build-up, reducing hardscape (eg. parking lots, building footprints), expanding open spaces and increasing the size of spreading grounds, adding drywall to infiltrate stormwater into aquifers, adding swales to small medians and yards, strengthening dams and levees, and evaluating land use and zoning designations within the proximity of the river (which may result in down-zoning).
