ANATOMY OF ZONING IN LOS ANGELES

[Q]C2-1-CDO

SPECIAL ZONING CLASSIFICATIONS

Site-specific or project-specific provisions that are established by ordinance as part of the Zone for a lot.

ZONE CLASSIFICATIONS

The zone classification dictates basic requirements and restrictions such as permitted and conditionally permitted uses, minimum lot area, yard and parking requirements.

HEIGHT DISTRICT

The height district designation determines the maximum Floor Area Ratio, Residential Floor Area Ratio, and sometimes number of stories and/or feet. Does not apply to R1 Variation Zones.

SUPPLEMENTAL USE DISTRICT

Supplemental use districts contain additional regulations beyond those required by the base zone regulations, usually to protect or create certain neighborhood characteristics.

Special Zoning	Classifications (Section 12.32 of the LAMC, T and Q Clas	sifications appear before the zone classification, while D limitations appear after the height district designation.)
(T), [T], T	Tentative Zone Classification	Tentative zone classification, pending certain required dedications, payments or improvements – see Council File
(Q), [Q], Q	Qualified Classification	Restricts uses allowed on property
D	Development Limitation	Restricts heights, floor area ratio, lot coverage, building setbacks

Supplemental Use Districts

Regulate uses which cannot adequately be provided for in the Zoning Code (Section 13.00 of the LAMC)

The following pages contain summaries of the bulk and massing regulations for the R1 Variation Zones, which are divided into "R1V" Variable-Mass, "R1F" Front-Mass, "R1R" Rear-Mass, and R1H" Hillside. All of the R1 Variation Zones are subject to encroachment plane limits, as well as the side yard plane break/offset requirement for all R1 properties. The encroachment plane and plane break/offset requirements are illustrated on Pages 15-16.

"R1H" Hillside Zones (R1H1, R1H2, R1H3, R1H4)

The maximum Residential Floor Area contained in all Buildings and Accessory Buildings on a property in an R1H Zone shall not exceed the sum of the square footage of each Slope Band multiplied by the corresponding Residential Floor Area Ratio (RFAR) for the zone of the Lot. Otherwise, a property in an R1H Zone shall comply with all of the R1 Hillside Area Development Standards pursuant to Section 12.21 C.10 of the LAMC.

R1 Encroachment Plane

The Encroachment Plane in the standard R1 Zone and R1 Variation Zones is an angled plane originating at a specified height above the minimum front and/or side yard setback and angling toward the interior of the lot. The mass of the building may not extend above the plane, except for specified roof structures and equipment, per LAMC Section 12.21.1. The 20-foot origin height shown here applies in the standard R1 Zone and in some R1 Variation Zones, while other R1 Variation Zones may specify a different origin height. See Subdivision C.5 of LAMC Section 12.08 for the precise dimensions that apply in each R1 Variation Zone.

R1 Side Wall Offset/Plane Break

In the R1 Zone, R2 Zone, and all R1 Variation Zones, all portions of a building that have a side wall more than 14 feet high and a continuous length greater than 45 feet must provide an offset or plane break at least 5 feet in depth beyond the minimum side yard. The offset or plane break must be at least 10 feet in length.
