

To: xx

We would like to bring to attention the need for a protected left turn signal at Overland Ave and Palms Blvd. Given the ever growing congestion that takes place between this corridor of the 10 and the 405, not having a left turn signal is causing dangerous driving maneuvers such as but not limited to, running yellow and red lights, blocking traffic, and speeding. Additionally, the lack of a protected left signal has caused even greater congestion often causing a stand still where drivers cannot turn during high traffic hours.

It is of this committee's resolve to formally request a protected left turn signal at Overland Ave and Palms Blvd. to build a safer and more accommodating driving experience for our stakeholders.

Thank you,

Palms NC Transportation & Infrastructure Committee
