TITLE: [Council File 23-1391 LOS ANGELES GREEN BUILDING CODE / EMBODIED CARBON LIMITS / CARBON-INTENSIVE BUILDING MATERIAL REDUCTION / CONSTRUCTION WASTE REDUCTION INCENTIVES / NEW CONSTRUCTION / ADDITIONS](#)

COMMITTEE: Transportation, Infrastructure, and Sustainability (T&I) Committee

POSITION: SUPPORT

THE MOTION: The Mar Vista Community Council supports the City's motion to update the Los Angeles Green Building Code and address embodied carbon in the built environment.

BACKGROUND: In order for the City to meet ambitious GHG emission reduction targets, it is imperative to address carbon emissions from building materials. The impact of development is on display in our community, and yet greenhouse gas emissions are invisible and often an afterthought when there is a development boom. We must change that if we are to meet the Sustainable City Plan for all buildings to be net zero by 2050 and the City's commitment to reducing embodied carbon for major construction (~buildings greater than 50,000 square feet) by 50% before 2030. This file should generate the kind of enforcement of the Los Angeles Green Building Code that will meet the current and future needs of Mar Vista and Los Angeles residents.

DIRECTED TO: City Council and Committees, including the Energy and Environment Committee and the Planning and Land Use Management Committee
