1. Around Valentine's Day, a tree was removed as part of a sidewalk repair on Moore Avenue completed by LA's Bureau of Engineering. This was due to a resident's request for ADA compliance on a sidewalk & driveway they made about 5-7 years ago. The city must perform those improvements, but when they do them is unknown.

During the process of repairing the sidewalk, the city's arborist determined that there was a tree emergency, and the tree there was in danger of falling. The city removed that tree immediately. Since it was only one tree (not three or more), there was no need for a public hearing. Additionally, the property owner provided permission to remove it.
