

Petition CD11 Councilmember Traci Park to repair Warren Avenue and Moore Street
While saving the mature Italian Stone Pines trees

Three healthy mature Italian Stone Pines on Warren are slated to be cut down by the city due to their roots creating issues for cars and bicycles going down the street. We are asking Councilmember Parks to have the street repaired to ensure safety by trimming roots instead of chopping down these beautiful trees and destroying a canopy that cools the neighborhood and provides a habitat for owls and other native wildlife.

Study after study shows trees improve human health and longevity by cleaning our air. They provide beauty to our streets, reduce the cost of cooling our homes, and greatly increase the value of our properties.
