

CATEGORY: Funding

DIRECTOR: Carolyn K. Honda (Outreach Chair)

PURPOSE: We need weights to weigh down our pop up.

BACKGROUND:

Mar Vista provides various events and opportunities throughout the year to bring neighbors together, whether it be for in person Outreach and or for Community projects. MVCC is fortunate to be included in some of the programs/events.

We have a beautiful pop up but did not purchase weights to hold it down. We have been at a couple events and the tent actually got off the ground and flew backwards. Luckily no one is in back of the tent. We need these for safety purposes.

THE MOTION:

The MVCC approves an expenditure not to exceed \$250 to purchase 16 canopy disks- 40 pounds per leg per the recommendation.

Weight Requirements by Conditions

Calm / Indoor: 15 to 25 pounds per leg (60 to 100 pounds total) prevents shifting from gentle bumps.

Moderate Wind (10–20 mph): 30 to 35 pounds per leg (120 to 140 pounds total) keeps the frame stable.

Strong Wind (20+ mph): 40 to 50+ pounds per leg (160 to 200+ pounds total); note that winds over 30 mph mean no canopy is completely safe and it should be taken down.

Canopy Weight Discs - Set of 4

Anchor your canopy on windy days.

- Disc-shaped, 10 lb. weights slide onto canopy legs.
- Polyethylene shell filled with solid concrete.
- Interlocking design for easy stacking and transport.
- Fits canopy legs up to 1 1/4" wide.
- Use with [Instant](#) and [Hi-Vis Canopies](#), sold separately.
