

Meeting Notes

NC – DWP MOU Oversight Committee

February 3, 2018

1. Presentation by Evelyn Cortez-Davis, Asst. Director Water Resources on Program to remediate contamination in the East San Fernando Valley aquifer.
The program is underway with completion expected by expected by 2020. This aquifer could supply up to 12% of the water requirements of the San Fernando Valley. The cost is estimated at just over half a billion dollars. About half of this money is expected from the State Water Resources Board out of Proposition 1 Funds. The rest will come from water rates, law suits against the responsible parties, and other State and Federal Programs.
