BOARD SPECIAL MEETING

Agenda for DRNC Board of Directors and General Meeting 7pm Wednesday , March 20th, 2019

At the MOA Wellness Center
4533 S Centinela Ave, Del Rey, California, 90066

The public is welcome – no charge.

Public Documents for all agenda items can be found online via the delreync.org website or directly at:
<http://tinyurl.com/DRNC-Board>

1. **Call to Order and Introduction**
2. **Director's Roll Call**
3. **Public Comment**
4. **New Business**
 - a. **Community Plan Motion (Wersinger)**– See attached Community Plan motion.

Supporting documents are available at:

<https://drive.google.com/open?id=19zeoTdj4Un6gN6CLO5hJSOXc1LirKxiL>

5. **Next meeting** - Thursday, April 11th, 2019, 7:15 p.m. at Del Rey Square
6. **Motion to Adjourn** –

PUBLIC INPUT AT NEIGHBORHOOD COUNCIL MEETINGS – The public is requested to fill out a "Speaker Card" to address the Board on any agenda item before the Board takes an action on an item. Comments from the public on agenda items will be heard only when the respective item is being considered. Comments from the public on other matters not appearing on the agenda that are within the Board's jurisdiction will be heard during the General Public Comment period. Please note that under the Brown Act, the Board is prevented from acting on a matter that you bring to its attention during the General Public Comment period; however, the issue raised by a member of the public may become the subject of a future Board meeting. Public comment is limited to 3 minutes per speaker, unless adjusted by the presiding officer of the Board.

PUBLIC POSTING OF AGENDAS - Agendas are posted for public review as follows:

**Del Rey Square 11976 Culver Blvd. Del Rey, California, 90066, <http://tinyurl.com/DRNC-Board>*

** You can also receive our agendas via email by subscribing to L.A. City's Early Notification System at <https://www.lacity.org/subscriptions>*

THE AMERICAN WITH DISABILITIES ACT - As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities. Sign language interpreters, assistive listening devices and other auxiliary aids and/or services, may be provided upon request. To ensure availability of services, please make your request at least 3 business days (72 hours) prior to the meeting you wish to attend by contacting Scott Dellinger, Board President, at email scott.dellinger@delreync.org.

PUBLIC ACCESS OF RECORDS – In compliance with Government Code section 54957.5, non-exempt writings that are distributed to a majority or all of the board in advance of a meeting may be viewed at Del Rey Square 11976 Culver Blvd. Del Rey, California, 90066, <http://tinyurl.com/DRNC-Board> or at the scheduled meeting. In addition, if you would like a copy of any record related to an item on the agenda, please contact Scott Dellinger, scott.dellinger@delreync.org.

Director/Open Seat
Enrique Fernandez, Area
G Director
Pavel Lerner, Area H
Director

In compliance with Government Code section 54957.5, nonexempt writings that are distributed to a majority or all of the Board in advance of a meeting, may be viewed at www.delreync.org.

RECONSIDERATION AND GRIEVANCE PROCESS

For information on the process for board action reconsideration, stakeholder grievance policy, or any other procedural matters related to this Council, please consult the Bylaws. The Bylaws are available at our Board meetings and our website www.delreync.org

SERVICIOS DE TRADUCCION

Si requiere servicios de traducción, favor de avisar al Concejo Vecinal 3 días de trabajo (72 horas) antes del evento. Por favor contacte a Scott Dellinger, Presidente de la Mesa Directiva, por correo electrónico scott.dellinger@delreync.org para avisar al Concejo Vecinal.

COMMUNITY PLAN MOTION

The Del Rey Neighborhood Council recommends the following items be considered as part of the Palms-Mar Vista-Del Rey Community Plan update.

These concepts are born over years of Land Use and Board meetings and discussions about both individual projects and larger issues.

COMMUNITY PLAN TENETS

The following community plan cornerstones should guide the overall strategy within Del Rey.

OPEN SPACE

Del Rey has both some of the most appealing open spaces in Los Angeles. We are the gateway to the coastal wetlands, and are home to a linear waterway system that connects the coast to inland Los Angeles. At the same time, Del Rey is underserved with recreational opportunities. There is extremely limited access to the natural areas noted above, and there are only a handful of small City parks. We must expand both access and interaction that is responsible and respectful of these natural lands.

- The Ballona Wetlands must be rezoned to match the existing protected uses and forever protected as open natural space;
- Any existing undeveloped land adjacent to creeks or wetlands must be rezoned and preserved as open space;
- The Centinela, Ballona and Sepulveda Creeks should be activated as greenways within Del Rey to both encourage a more practical interface with the public but also to return areas to a more natural condition; the Del Rey NC is on record supporting a broad approach to this which includes not only rejuvenating and activating the creeks themselves, but incorporating the surrounding areas with added interfaces, for recreation, education and environmental purposes.
- Adjacent properties to the wetlands or our creeks with existing structures should be subject to restrictions as to uses, density, height (no more than two stories) and massing as it relates to the interface with open space, special lighting rules to avoid light pollution, and higher than normal open space requirements on redevelopment projects in these zones.

SOCIAL AND ECONOMIC DIVERSITY

Del Rey is a place with unusual diversity within the Westside of Los Angeles. Communities of various ethnicities, cultures and economic status have coexisted here for a very long time and been integrated throughout our area. It is very important to plan ways for development and growth to occur that supports this quality without sacrificing it.

DENSITY & INFRASTRUCTURE

Del Rey has accepted and even promoted density in various areas, including around Jefferson Blvd, and in the Glencoe Maxella Specific area. However, in many cases this density has outpaced infrastructure.

Examples within the Glencoe Maxella Specific Plan include:

- lack of sidewalks on Glencoe Ave that would otherwise allow for better walkability;
- addition of traffic counts with regard only to individual projects, while lacking a look at the overall impact when multiple projects are built;
- multiple local intersections already rated F not improved before additional development is allowed;
- basic traffic infrastructure lacking such as turn signals (Mindanao at Glencoe) and stoplights (Del Rey and Maxella) resulting in gridlock;
- lack of any bike lanes or aforementioned connections to the South and West;
- lack of light rail or dedicated bus lanes on Lincoln to enhance public transportation options;
- no street cleaning or other services to keep up with the changing character of the neighborhood.
- continued installation of above ground utilities, creating a visual blight on the area
- there is a complete lack of public open space and both installation and maintenance of public landscaping is sorely missing.

It's clear that infrastructure growth doesn't keep pace with development and that city wide there is insufficient planning for the impacts of denser development until far after the impacts are felt.

Improvements addressing the above must be made part in parcel with added development. While the Del Rey NC supports density in appropriate areas, there must be a new mechanism to keep the improvement of public services and infrastructure in lock step.

Further, while R1 and its purpose in a dense city may eventually be revisited on a city wide or state wide basis and via a broader planning analysis, the Del Rey NC currently supports maintaining the existing single family density in all R1 zones in Del Rey.

COMMERCIAL CORRIDORS & HUBS

Del Rey has the advantage of a few commercial corridors that could provide services within walking distance to many Del Reyans. Development in commercial corridors or corners must be mandated to include commercial and pedestrian friendly interfaces. Examples of such areas include:

- Culver Blvd and Inglewood Blvd
- Culver Blvd. and Centinela
- Culver Blvd. and Slauson
- Maxella and Glencoe in and adjacent to the Specific Plan area
- Jefferson and Inglewood
- Jefferson and Centinela
- Marina Marketplace and Villa Marina Center
- Sepulveda and Lucerne
- Centinela between Culver City and the Ballona Creek

The zoning of these areas should be protected and preserved with some commercial use component mandated in addition to optional residential in order to provide support services and diverse uses to adjacent existing residential populations.

CREATIVE AND SMALL BUSINESS OPPORTUNITIES

Del Rey has some unusual Light Manufacturing districts which are unique to the westside and feature older small scale buildings that are very suitable to startup and small businesses. In order to preserve opportunities for local and nearby residents to obtain suitable space for these types of businesses, the existing building in these areas should be preserved, modernized and adapted as much as possible.

Unrestricted demolition and redevelopment may result in higher rent and larger scale commercial space that could price out the current market.

HEIGHT LIMITS

There should be no unlimited height zones in Del Rey. Currently, they exist north of Jefferson (though in reality limited by the proximity to LAX) and in a few places along Washington Blvd adjacent to the Culver City line. These should be capped at heights similar to the surrounding development.

Del Rey has remained primarily a place made up of buildings that are most often one and 2 stories tall, with multifamily areas that only occasionally reach the 45' R-3 height limit (with the exception of the Glencoe-Maxella Specific Plan area). It would be most appropriate to maintain the existing development height maximums, in order to preserve access to our coastal breezes, open vistas, abundance of daylight and overall 'beachy' feel.

MOBILITY

Del Rey has the advantages of having areas that are walkable, offering housing close to places of business, having access to several major transit corridors, and connections to important recreational opportunities. To take full advantage of these opportunities, the following must be considered in any community plan:

- implementation of safe bike lanes that cross the Ballona Creek and connect north and south Del Rey; the Del Rey NC is previously on record supporting some form of a bike bridge in the vicinity of McConnell or Beethoven;
- the same to access areas west of Lincoln, as there is currently no bike lane connection across Lincoln Blvd to connect Del Rey with the Marvin Braude bike path or the beach areas; the Del Rey NC is on record supporting efforts to improve these connections and make a safe and proper point of access either at Lincoln or Maxella
- bike routes connecting Del Rey to other neighboring communities (Mar Vista, Playa Vista, Playa del Rey, Culver City & Venice) should also be developed. These are primarily in the north-south direction as well.
- encourage development that allows more people to commute to work and shop/dine on foot or bicycle; such areas should include live/work and mixed use projects along designated commercial corridors and within specific plans;
- mandate and speed the changeover of Lincoln Blvd from a car centric bottleneck to some form of mass transit (either bus express lanes or light rail);
- support and advocate for current Metro plans for an underground rail line down Centinela through the heart of Del Rey that would both allow direct rail access for Del Reyans but also alleviate the north/south cut through congestion that plagues our neighborhoods;
- find additional solutions to the north/south traffic that transits Del Rey but does not originate in Del Rey, including traffic cut throughs to and from the South Bay and Playa Vista to the South and Venice and Santa Monica to the north;
- maintain and augment existing bus lines that allow residents to access the Expo line via Washington, Culver & Lincoln Blvds;
- recognize that modern transportation networks necessarily include bike sharing, ride sharing, scooting, and micro transit, and these are crucial to maximizing mobility and lessening our dependence on cars; Los Angeles must foster partnerships with both public and private providers and mandate proper coordination of these networks through data sharing and technical analysis. The Del Rey NC is on record supporting a data based approach to ride sharing.

BEAUTIFICATION

The Community Plan should encourage architecture and site planning that contributes beauty, quality and environmental sustainability to the neighborhood. The public interface of our buildings must also work hand in hand to make Del Rey a more livable space.

City codes are too lax in allowing open space in projects to be on rooftops or other areas that don't actually appear as open space to the community or invite the public to enjoy them.

Particular attention must be paid to the interface between the public and our buildings and making them pedestrian friendly and not walled off.

Improvements to the public rights of way should also be enhanced in all areas.

DEL REY CHARACTER AND IDENTITY ENHANCEMENT

Del Rey has a set of physical and lifestyle characteristics that are truly unique in Los Angeles and even to the Westside. These are partially due to our proximity to the coastal environments and the wetlands and because of Del Rey's status as a sanctuary from overdeveloped nearby communities. This results in a relatively low density, diverse collection of residential and small scale commercial neighborhoods.

Efforts should be taken to recognize these unique qualities, preserve and enhance them and encourage local pride amongst our residential and business communities.

Some ideas that have come up to support this idea would be:

- implementation of an extensive and creative Del Rey signage program in our most visible areas as well as at the entry points to Del Rey.
- creation of identifiable public landmarks, such as monuments, iconic public art and architecture, plazas or public gathering spaces.
- establishment of a community building, center or other public facility where community functions and meetings can take place in a centralized location.

AREA SPECIFIC CONCERNS

The following recommendations concern particular areas and zoning issues that follow along the above tenets.

GLENCOE MAXELLA SPECIFIC PLAN

This Specific Plan has served the area well, however a changes are recommended after seeing the affects of its implementation over many years.

First and foremost, the boundaries of Del Rey iteself should be expanded to include the parcels between Del Rey and Lincoln Blvd, between Maxella and Lincoln. This area is technically part of the Venice NC and Venice Community Plan, however east of Lincoln falls within the Specific Plan and is de facto part of Del Rey.

We also recommend to include in the Specific Plan thought not Del Rey all four corners of Lincoln and Washington for reasons outlined below. This intersection, while not currently in Del Rey, is directly adjacent and is currently one of the most poorly developed and planned major intersections in Los Angeles.

With this in mind, the following alterations should be made in the Specific Plan:

- remove public storage facilities from the allowed new construction; these do not encourage the mixed use character that should dominate this area;
- require all developers entering into large scale renovations to install sidewalks, not just those building new buildings;
- allow residential/mixed use along Lincoln Blvd;
- mandate an affordable housing component in all new buildings;
- expand to include the Lincoln/Washington intersection with an eye towards a master redevelopment of that intersection to include protected bike lanes along Washington (via widening with redevelopment), a more pedestrian forward interface, buildings that involve and invite the public to interact, landscaping, and mixed residential/commercial opportunities with affordable housing;
- as noted above, the strip of land between Del Rey and Lincoln Blvds, between Washington and Maxella, should be ceded from Venice to Del Rey as it falls with the existing Glencoe Maxella Specific Plan and the interests of that strip align much more with the priorities of the neighborhood to the east of Lincoln than that to the west.
- a more rigorous open space component must be included; such open space must be publicly accessible
- the Plan must encourage parklets or other innovative use of street space
- street widening must be maintained as written in the existing Specific Plan
- mandatory public infrastructure contributions to be used towards improvements within the plan area or adjacent (items such as turn signals, street cleaning, preservation of open space etc)

MARINA MARKETPLACE

The Marina Marketplace, south of Maxella, could be included under the Glencoe-Maxella Specific Plan however with special conditions. While residential zoning use may be applied, this property is currently a vital commercial center that helps establish the surrounding community as a walkable neighborhood, therefore ensuring a modernized commercial redevelopment should be the priority here. Also, density should be limited to ensure responsible development in harmony with the surrounding neighborhood with strict attention paid to open public space, height, massing and stepbacks, traffic generation, noise and air pollution, in addition to and the maintenance of a substantial commercial component. Generally the height and density should not exceed that of the adjacent Glencoe Maxella plan.

BALLONA WETLANDS

We advocate for the creation of a Ballona Wetlands Specific Plan or the zoning of adjacent lots using new ReCode tools that outline the steps needed to caretake this vital open space. Such a Plan would protect all existing open space and the following basic points would govern redevelopment on adjacent properties adjacent to both the wetlands and all creeks running through Del Rey:

- all redevelopment must be considered based on not just *how* the building fits into the surrounding environment, but *whether* the building fits into the surrounding environment to begin with;
- any new projects, if approved, must include no less than 20% of lot area dedicated to public open space; additional setbacks and yard sizes facing the creeks should be required;
- place limits on lighting that conflicts with wildlife;
- create specific softscape, heat island and stormwater management aspects within the new zoning;
- no industrial zones should be allowed and any existing should be rezoned to open space or low density residential with density limits that match the interface described above.

CENTINELA GREAT STREETS

Further, Centinela Blvd is Del Rey's 'Main Street' and demands attention to enhance the pedestrian experience and prioritize the commercial appeal of the street. Please refer to our communities' prior and current Great Streets applications for Centinela Blvd for the entire plan. Augmentation of this street must be included in any future vision of Del Rey.

AVON WAY/KENSINGTON WAY

The area bounded on the north and south by Culver Blvd and Washington Blvd, and Lindblade and Berryman on the east and west is chronically underparked and with each and every project that is built, we have heard concerns. The existing City standards are not sufficient and we suggest a parking overlay that mandates more parking than citywide code. Units must require one space per bedroom with no exceptions, and guest parking must be included. Affordable housing units must be mandatory in this area as well.

MAR VISTA GARDENS

While this is an area that while under HACLA control, there may be a time in the future when it becomes available for development. Given the relatively low density of the site currently and the existing status as an enclosed community, this should be rezoned for denser development but under public control in any event, both as low income housing with the potential for a transitional housing component in addition to integrating some market rate units as space allows and include various other components such as commercial corners and open space. Long time community members must be given first priority in any new development at this site. Up zoning this land may spur a public-private partnership to rebuild this important neighborhood while maintaining its current opportunities for low income housing.

MESMER TRIANGLE

Light industrial is disappearing on the west side and this is a vital and vibrant pocket of it that should remain. This area is a prime candidate for adaptive re-use and should not be rezoned for any other general use other than as it exists. Redevelopment should be limited in lot size to prevent large scale demolition and projects that would alter the current character and at least 50% of any existing building should be maintained under any redevelopment. This maintenance of the status quo should not preclude improvements to the public right that facilitate pedestrian safety and beautification, as the area is lacking in sidewalks and safe buffers between pedestrians and roadways.

AREA H

The part of Del Rey south of the Ballona Creek and west of Centinela requires specific attention. Currently it is home to a vibrant commercial and light industrial community.

As with the Mesmer Triangle area, adaptive reuse should be emphasized. At least 50% of any existing building should be maintained in new development to encourage adaptive re-use. Existing heights should be maintained in any new development in order to keep the mid rise character of the area. All developments should be required to maintain an open interface with the public rights of way and be required to include a ground floor commercial component, open space, or substantial community improvements such as food truck parking/service areas.

CONCLUSION

The above are not binding suggestions and the Del Rey NC retains the right to adjust the specific points above based on the results of the draft Community Plan and EIR and its findings, as well as continued community input over the coming months. The Council reserves the right to review individual projects on a case by case basis and make adjustments to the above motion as needed.
